

Pre-requisite:

- i. virtualenv
Use following command to install virtualenv:
`pip install virtualenv`
- ii. VS Code
Download it from <https://code.visualstudio.com/download>

How to Run?

In env folder run command, **.\Scripts\activate** to activate virtual environment

Change directory to src folder using command **cd src**

Run command **python .\manage.py runserver** to run the program. {In windows system it doesn't work on command prompt. Use VS Code terminal.}
