

Pre-requisite:

- i. Virtualenv
Use following command to install virtual env
pip install virtualenv
- ii. VS Code
Download it from <https://code.visualstudio.com/download>
{On windows virtualenv doesn't work properly on command prompt}

How to Run?

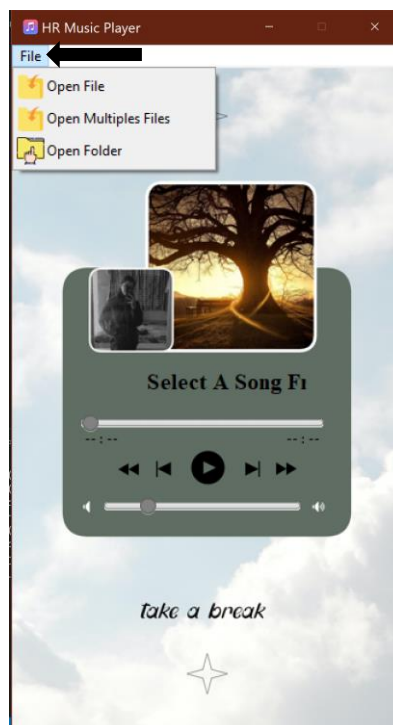

In env folder, run command **.\Scripts\activate**

Change directory to src using **cd src**

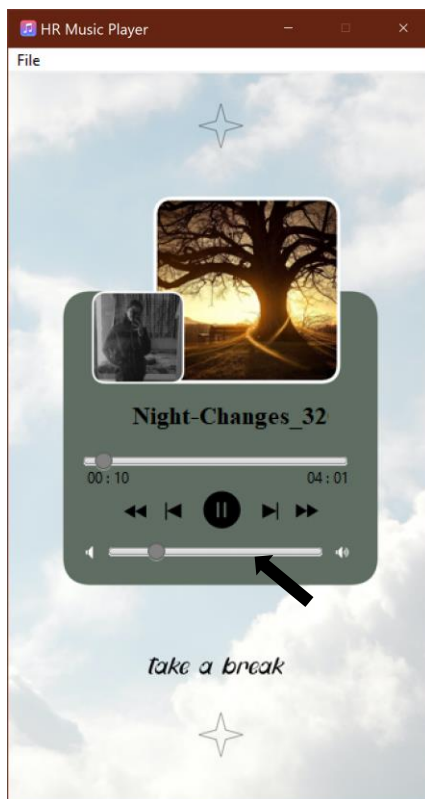

Run command **python player.py**

Features:

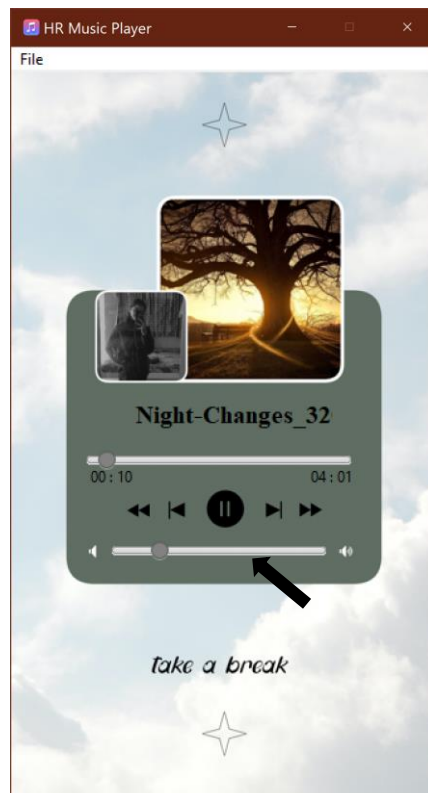

Use File menu to select song. You can select single file or multiple file or a folder.
Only .mp3, .wav and .ogg files can be played

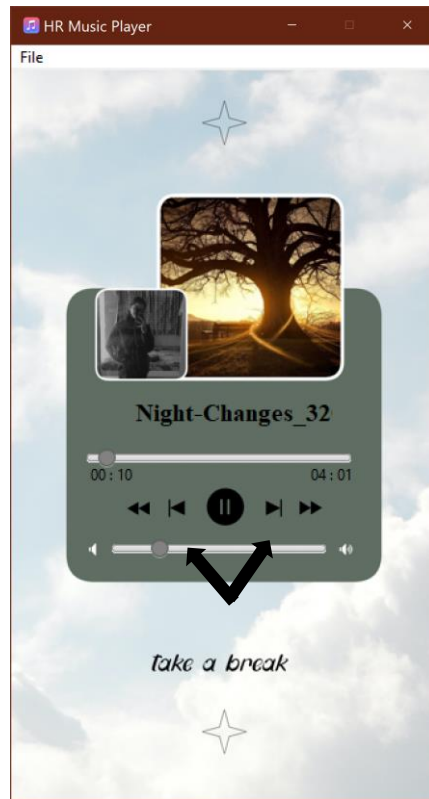

Play/Pause Button can be used to stop or pause the song.

Scroll Sound Bar to increase or decrease volume.

Next and previous buttons can be used to change song.

Forward and Backward button can be used to forward or backward the song by 5 secs.
